Mr. Andrew Soukup
ADM Milling Company
P.O. Box 610
Beech Grove, IN 46107

Re: 097-17744-00016
First Administrative Amendment to
FESOP 097-14650-00016

Dear Mr. Soukup:

ADM Milling Company was issued a permit (FESOP 097-14650-00016) on July 21, 2003 relating to the operation of a grain elevator and flour mill.

On July 28, 2003, it was brought to the Office of Environmental Services (OES) attention that the mailing address was incorrectly recorded in Section A.1 (General Information) of the recently issued FESOP Renewal (F097-14650-00016). A request by OES was made to correct this mistake. Pursuant to the provisions of 326 IAC 2-8-10(a)(2), an Administrative Amendment to the Federally Enforceable State Operating Permit (FESOP) number F097-14650-00016 is required. The permit is hereby administratively amended as follows. The bold language is new language that has been added, and the language with a line through it has been taken out. These are only being used in this letter to emphasize the change made. The permit will already be revised to state:

1. The mailing address in A.1 is amended to reflect the change in mailing address from 854 Bethel Avenue to P.O. Box 610. This will affect page 6 of 60 of the FESOP. The permit is amended as follows:

A.1 General Information [326 IAC 2-8-3(b)]

The Permittee owns and operates a stationary source for the operation of a grain elevator and flour mill.

Authorized Individual:	Plant Manager
Source Address:	854 Bethel Avenue, Beech Grove, Indiana 46107
Mailing Address:	854 Bethel Avenue P.O. Box 610 , Beech Grove, Indiana 46107
General Source Phone:	(317) 263-0548
SIC Code:	2041
Source Location Status:	Marion
County Status:	Attainment for all criteria pollutants
Source Status:	Federally Enforceable State Operating Permit (FESOP) Minor Source, under PSD Rules; Minor Source, Section 112 of Clean Air Act

All other conditions of the permit shall remain unchanged and in effect. Please attach a copy of this amendment and the following revised permit pages to the front of the original permit.

This decision is subject to the Indiana Administrative Orders and Procedures Act - IC 4-21.5-3-5. If you have any questions on this matter, please contact Nikki Olsen, at (317) 327-2182.

Sincerely,

Original Signed by John B. Chavez

SECTION A SOURCE SUMMARY

This permit is based on information requested by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ) and the City of Indianapolis Office of Environmental Services (OES). The information describing the source contained in conditions A.1 through A.3 is descriptive information and does not constitute enforceable conditions. However, the Permittee should be aware that a physical change or a change in the method of operation that may render this descriptive information obsolete or inaccurate may trigger requirements for the Permittee to obtain additional permits or seek modification of this permit pursuant to 326 IAC 2, or change other applicable requirements presented in the permit application.

A.1 General Information [326 IAC 2-8-3(b)]

The Permittee owns and operates a stationary source for the operation of a grain elevator and flour mill.

Authorized Individual:	Plant Manager
Source Address:	854 Bethel Avenue, Beech Grove, Indiana 46107
Mailing Address:	P.O. Box 610, Beech Grove, Indiana 46107
General Source Phone:	(317) 263-0548
SIC Code:	2041
Source Location Status:	Marion
County Status:	Attainment for all criteria pollutants
Source Status:	Federally Enforceable State Operating Permit (FESOP) Minor Source, under PSD Rules; Minor Source, Section 112 of Clean Air Act

A.2 Emission Units and Pollution Control Equipment Summary [326 IAC 2-8-3(c)(3)]

This stationary source consists of the following emission units and pollution control devices:

- (a) Grain receiving area, identified as emission unit ES1, was installed in 1992. Grain receiving is separated into areas and enclosures for both truck and railcar receiving. Truck unloading is aspirated to a baghouse, identified as CD1. Fugitive particulate emissions are controlled by a three sided enclosure which is rated at 60% control efficiency.
- (b) Grain loadout, identified as emission unit ES2, was installed in 1992. Grain loadout is separated into areas and enclosures for both truck and railcar loadout. Railcar loading is aspirated to a baghouse, identified as CD2. Fugitive particulate emissions are controlled by a three sided enclosure which is rated at 60% control efficiency.
- (c) Grain storage and handling, identified as ES3, was installed in 1992 and consists of 123 bins, conveyors, transfer points and the grain dryer. 123 bins have a total storage capacity of 5,835,000 bushels, and are controlled by three (3) baghouses, identified as CD3, CD4, and CD5. The grain dryer is fired with natural gas and has a heat input capacity of 19.98 MMBtu per hour. The maximum throughput capacity for the grain dryer is 56 tons per hour. Fugitive emissions from grain handling are controlled by enclosed conveyors and transfer points.
- (d) Cleaning house, identified as emission unit ES4, was installed in 1992. The wheat cleaning house is controlled by seven (7) baghouses, identified as CD6, CD7, CD8, CD9, CD10, CD11, and CD12.
